Syllabus

The German economy ranks highly on innovation indicators such as research & development spending and patenting activity. Innovations “made in Germany” are being exported around the world. Being dynamic, international and creative, Berlin has become a European centre for start-ups, often being dubbed as the “Silicon Valley on the River Spree». The Berlin School of Economics and Law (BSEL) is deeply involved with the Berlin startup ecosystem: in its business incubator many young entrepreneurs have been encouraged to develop ideas and start their own businesses.

The programme offers students a strong grounding in how to start and grow a business in a dynamic market, using the vibrant Berlin startup scene as an example. In small projects they will participate in the development of new innovative business models of real startups from the for-profit and non-profit sector. As a course result they will be able to identify the key success factors in entrepreneurship and apply models and tools of innovation & technology management.

Lecturers

Prof. Dr. Sven Ripsas, Prof. Dr. Andreas Zaby
(subject to change)

Week 1: Entrepreneurship in Berlin

Students will be able to understand entrepreneurship as the iterative development of an innovative and value creating business model. They will identify and understand the key success factors in entrepreneurship, write a business plan, and present a pitch deck and learn to assess their own strengths and weaknesses as an entrepreneur.
